Ferret Marker

Installation Guide for Ferret Marker ScriptUI Panel

Step 1: Extract the File

1. Extract the zip file Ferret_Marker_v1.0.zip to your preferred directory.

Step 2: Install in After Effects

2. Open **Adobe After Effects.**

3. Navigate to **File**, then **Scripts**, and choose **Install Script UI Panel**.

4. In the dialog box, go to the location where you extracted Ferret Marker.jsx, select the file, and proceed with the installation.

5. Close After Effects once the installation is complete.

6. Reopen After Effects.

Step 3: Use the ScriptUI Panel

7. In After Effects, go to **Window** and select **Ferret Marker.jsx** that is at the very bottom of the list.

8. The Ferret Marker panel should open, allowing you to start using the script's features

Step 4: Dock the ScriptUI Panel (Making It Stay Put)

9. Locate the panel tab. It's labeled "Ferret Marker" with a menu icon: ☰

10. Click and hold on the Ferret Marker tab, then slide it onto any part of the After Effects interface. The interface will highlight potential docking locations as you move the panel around.

11. Release the mouse button to "drop" the panel in that location.

12. Now, the Ferret Marker panel is docked, meaning it stays put in the After Effects interface for easy access.

13. You can rearrange the panels by clicking and dragging their tabs.

That's it! You've successfully installed and docked the Ferret Marker ScriptUI Panel in After Effects. Refer to the online tutorial for details on the script's functionalities and usage.
